

Abstract

Diploma thesis "The influence of the major players in the labour market on solving unemployment in Litomerice region." is dealing with the problem of long-term unemployment through cooperation in the field of major players in the labor market. Current employment policy objectives, based on the strategy of "Europe 2020" puts the emphasis on efficient use of active employment policy, which is one of the major tools for dealing with unemployment. This work addresses the layed out issues at the local level of Litomerice region, knowledge of the local labor market and job opportunities supports meaningful use of these tools. Developing cooperation with all actors in the labor market supports the complexity of employment programs, which may positively affect the development of employment opportunities at the regional level. The purpose of this study is to analyze the current state of cooperation in tackling unemployment and develop proposals to improve the use of all available options when dealing with unemployment.
